

Lecture

“Advanced Methods in Automatic Speech Recognition”

SS 2010

Type	Schedule / Room	Start	Instructor
V4/3	(für Diplom und Master Informatik, Master SSE und Master MI) Di 15 ⁴⁵ –17 ¹⁵ 6019 Do 14 ⁰⁰ –15 ³⁰ AH 6	20.04. 22.04.	Dr.rer.nat. R. Schlüter, Prof. Dr.–Ing. H. Ney
Ü2	Di 15 ⁴⁵ –17 ¹⁵ 6019	27.04. biweekly	t.b.a.

Content:

- Recapitulation speech recognition with large vocabulary and linear lexicon
- Search with lexical prefix trees
- Word graphs and word pair approximation
- Time-conditioned search
- Coarticulation and word segments
- Confidence measures and system combination
- Discriminative training
- Speaker adaption and normalization
- Current topics

The lecture covers advanced aspects of automatic speech recognition. Special emphasis is put to decoding/search beyond linear lexica, modelling of words and word boundaries, and discriminative training of speech recognition systems.

Assignment:

Applied Computer Science or Field of Specialization

Requirements:

Modul (Introduction to) Automatic Speech Recognition or comparable knowledge in the field of automatic speech recognition.
